

Wilmington Trolley CityLink

Linking Wilmington's Past, Present and Future by Trolley

The Wilmington Trolley CityLink (WTC) will provide Wilmington residents, workers and visitors with a car-free, zero-emission rail transit link connecting Downtown Wilmington offices, residences, hotels, theaters, shops and restaurants with the attractions and residences on the Riverfront via the Amtrak/SEPTA train station. Special event and seasonal service to Brandywine Park will also be available. Unlike Wilmington's original streetcar network, which was abandoned before World War II, Wilmington's 21st Century rail transit will be operated with modern, battery electric trolleys on streetcar tracks that will eliminate the need to build overhead power lines above city streets except at the recharging terminals. Fast, Frequent, Free trolley transit service will generate economic growth by attracting more businesses, residents and visitors to Wilmington.

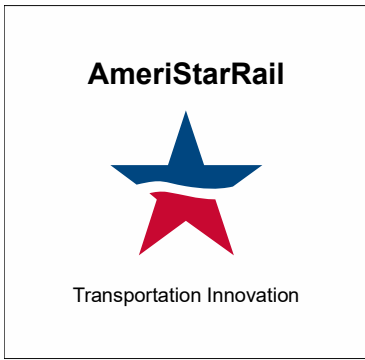

Wilmington Trolley CityLink Facts:

- Battery electric trolleys operate every 10 minutes, 7 days-a-week
- Approximately 2 route miles long
- Connections to Amtrak, SEPTA and DART routes
- Provides a fast, frequent way to connect the city across Martin Luther King Jr. Blvd.
- Weekday park and ride lots for commuters on the Riverfront reduces Downtown Wilmington traffic and parking congestion
- Fare Free trolleys provides fast, frequent transit service to encourage "easy on, easy off" use of transit between restaurants, theaters, shops and other attractions
- Rotating corporate sponsorships and government operating subsidies will provide Fare Free service to attract new businesses, residents and more visitors to Wilmington
- Each trolley has capacity for 100+ passengers and is ADA and bike accessible
